

Offer your customers something new and unique: the most dazzling UV print productions the world has ever seen. Inks specially developed for swissQprint large format printers - easy to retrofit.

Neon meets UV

Should the advertising medium create a real splash? Is there a themed event coming up where the wristband for guests is part of the design concept? Does a pop art show need just the right setting? Ideal opportunities to try out neon inks!

Applications

Neon prints are ideal for indoor applications.

- Posters, ceiling hangers and POS displays
- Information and guidance systems
- Trade fair and event concepts, including wristbands
- Safety notices or campaign signage and much more besides

Incidentally, neon colours are fluorescent in black light.
Are you getting a flash of inspiration?

The range

Add to your printer's individual ink configuration.

- ♦ Neon Yellow
- ♦ Neon Pink

These inks are designed for swissQprint flatbed and roll to roll printers with LED curing and exclusively for indoor applications.
